

# Advanced Learning Opportunity School Plan

School Name

School Year

***\*\*Your school's ALO Plan is updated every spring to post on the SPS Advanced Learning Website. Your plan should reflect three things; your school's model, strategies and enrichment opportunities. Seattle Public Schools identifies students in reading and math, therefore your ALO Program should describe how students are being accelerated one- year above grade level in these two content areas.***

## **ALO Model:**

Give examples of the service model being used in your school. This model should fit your building and your community. Some examples might be, but are not limited to:

- Differentiation/Acceleration within the Regular Classroom
- "Walk to Reading, Walk to Math" (Literacy/Math Blocks)
- Pull-out program
- Others?

## **ALO Strategies:**

Give examples of how math and literacy are being accelerated one grade level above within your school. SPS identifies children in reading and math, therefore the ALO Program must reflect services in these content areas. These strategies should reflect "Best Practices." Some examples might be, but are not limited to:

- Curriculum Compacting
- Tiered Assignments
- Flexible Groupings
- Independent Studies
- Others?

## **Enrichment Opportunities:**

Give examples of enrichment activities within your building outside of the math and reading acceleration. Examples might be, but are not limited to:

- Chess Club
- Literacy Circles
- Math Olympiad
- Destination Imagination
- Future Problem Solvers
- Others?
