

## Five Year Plan Community Forum – Rainier Beach High School

1. *What changes need to be made in the Seattle School District and in your child's school to help your child succeed in school and life?*

- The District have to start the education early like 4 years to be in Kindergarten.

We have a proverb which says: **“You can straighten the trees while they are small”**.

2. *How can you and your family help your child to succeed in Seattle Public Schools?*

- To be involved in my child's education, the District have to give the parents the opportunity to meet with the teacher at least 6 time of the school year in order to know their children's progress and their weakness. The teacher have to inform the parents how their child is doing in everything like his/her behavior, manners, obedience, respect because in my culture we measure the personality a lot.
- We believe if the child have support from his family and he/she sees the involvement of his parents his moral for the education will be high, and he/she knows that somebody is at his back supporting him/her.
- Also we expect the teachers to be honest and teach the children from the bottom of their hearts, and see the child as their own because that is my culture.

3. *What is the best way for Seattle School District to get your feedback on how well the District programs are helping your child or children to learn?*

- Meeting with the school Principals and discussing our own needs and expectations as a community.
