

# Want to **CHANGE** the world, **FIGURE** it out, or **CREATE** the next Xbox?\*

\*It all starts with STEM (Science, Technology, Engineering & Math)

## IS STEM RIGHT FOR YOU?

The STEM program at Cleveland won't be just for science nerds. If you're interested in playing video games, protecting the environment, or saving lives with new vaccines... STEM could be just right for you.

STEM will give you the chance to solve real world problems in school. Even better, STEM will prepare you for a whole world of opportunity (and a lot of good paying jobs too).

## HOW WILL STEM WORK?

STEM will help you learn with:

- Engaging and challenging project-based learning;
- Real-world internship opportunities;
- Computers and technology in every class;
- Extra support to help all students succeed; and
- The chance to earn college credit during high school.

In addition, STEM will offer core classes in language arts, social studies, and world languages, as well as extracurricular activities.

## WHAT WILL YOU STUDY AT STEM?

At STEM, you'll have a choice of two different academies:

### LIFE SCIENCES & GLOBAL HEALTH

or

### ENGINEERING & TECHNOLOGY

Each academy will help you succeed in college and prepare you for careers in exciting fields, including global health, software design, gaming, and engineering.

## HOW CAN YOU ENROLL?

If you'll be starting 9th or 10th grade in September 2010, you can enroll in STEM. There are NO entrance requirements. Just ask your family to help you fill out the form during Open Enrollment between March 1 and 31.

If you need a little extra help with your classes, there will be support to help you catch up.

If you're already ahead, you'll find plenty of challenge in STEM's rigorous college prep curriculum.
