# Apprenticeship Program

§43 apprentices on Seattle Public Schools Projects

§20 apprentices on various other projects, union and non-union companies

§16 students currently in various stages of qualifying for apprentice opportunities

This data represents an aggressive effort to provide prepared students to the work force. Our apprenticeship preparation program is geared towards preparing students and young people for the workforce. We accept Seattle Public School students, graduates and other young people. We provide support services to all participants which includes: physical assessment, drug testing, math assessment and drivers license retrieval and assistance. Anyone who is deficit in any of these areas, we provide support services to overcome the deficiency. We also have a direct hire program, whereas qualified students we are able to place directly in apprenticeship opportunities in the workforce, where available.
