

Dear Family,

During the next few months, our class will be learning about how land and water affect each other as part of our *Land & Water* science unit. We will be using models filled with soil and pouring water into them to investigate how flowing water changes land.

We know that children do better in school when their families are actively involved in their learning. Here is one activity that you can do with your child at home to strengthen both your own and your child's understanding of the interactions between land and water.

Family Activity: During or after a rainstorm, take a walk with your child(ren) around your yard and your neighborhood. Look for places where the rain and flowing water has washed away soil. Investigate where this soil that has been washed away is ending up. Is the soil being washed onto the street or sidewalks? Is it being washed down a storm drain? Talk about how everything that gets washed down a storm drain ends up in a stream and eventually may end up in the Puget Sound. Talk about how the plants and animals in the stream and in the Puget Sound are harmed by excess soil and other substances that flow into them. Finally, ask your child(ren) what s/he thinks you can do as a family to prevent soil from being washed away in your neighborhood or yard.

I am always eager to have family members come in and share their knowledge and experience related to our units of study. If you have a skill or experience related to geology, hydrology, or anything that involves land and water interactions that you would be willing to share with us, please call or email me.

Attached to this letter is a sheet with many suggestions for supporting your child's science understandings at school, at home, and around the Seattle area. Please keep this sheet and take advantage of the suggestions as often as possible!

Thank you very much for all you do for your child.

Sincerely,

Family Strategies for Supporting Science

At School

- Talk to your child's science teacher about how your child is doing in class.
- Chaperone a science field trip.
- Volunteer to inventory a science kit for the teacher.
- Volunteer in your child's science class.

At Home

- Encourage your child to ask questions about the world as much as possible, and avoid giving answers. Encourage observation, exploration, investigation, or research instead.
- Ask your child thoughtful questions and teach her to provide evidence for her thinking by using the word "because" in her explanation (I think the fish is dead *because* it is floating upside down.).
- Encourage your child to draw detailed, colorful, labeled illustrations of things he is observing at home or school.
- Read non-fiction books together in your family's home language.
- Read the newspaper together: talk about a science-related article.
- Talk about the natural history of your country of heritage (e.g., Mt. Pinatubo in the Philippines, Mt. Fuji in Japan, tsunami in southeast Asia, Himalayas in India, Great Rift Valley in Eastern Africa).
- Cook together: talk about what you are doing as you are cooking.
- Work together in the garden: plant vegetables, start a family compost or a worm bin.
- Go through a kitchen cabinet: talk about which foods are good for you and which aren't; look at the ingredients and nutritional information on labels.
- Have your child help with small (and safe) repairs around the house.
- Find safe experiments to do together at home.
(www.exploratorium.edu/science_explorer/ has a great list)
- Listen to "Science Friday" on National Public Radio together.
(Fridays, 8-10pm on KUOW 94.9 FM)
- Choose appropriate science-related programs on TV to watch with your child:
Public Television (KCTS, Channel 9)
Discovery Channel
Animal Planet Channel
National Geographic Channel
Nature Channel
- Choose appropriate science-related websites to view with your child:
Bill Nye, The Science Guy (www.nyelabs.com)
How Stuff Works (www.howstuffworks.com)
Cool Science for Curious Kids (www.hhmi.org/coolscience)
Extreme Science (www.extremescience.net)
Cool Cosmos (<http://coolcosmos.ipac.caltech.edu>)

Science News for Kids
Mt. St. Helen's Cam

(www.sciencenewsforkids.com)
(<http://www.fs.fed.us/gpnf/volcanocams/msh/>)

In the Seattle Area

- Go for a walk around your neighborhood: talk about how people have changed the natural environment in positive and negative ways; come up with ideas for how your family could make more positive changes in your neighborhood; talk about the landforms you see and how they were formed (e.g., Mt. Rainier).
- Go to the public library: find books about animals, insects, inventions, electricity, natural disasters, space.
- Go to the beach at low tide (e.g., Lincoln Park, Alki Beach, Carkeek Park).
- Take a trip to the...

Pacific Science Center	206.443.2001	(www.pacificsciencecenter.org)
Woodland Park Zoo	206.684.4800	(www.zoo.org)
Seattle Aquarium	206.386.4300	(www.seattleaquarium.org)
Seattle Children's Museum	206.441.1768	(www.thechildrensmuseum.org)
Museum of Flight	206.764.5720	(www.museumofflight.org)

Admission is free the first Thursday of every month

Science Fiction Museum	206.724.3428	(www.sfhomeworld.org)
------------------------	--------------	--

Admission is free from 5-8pm the first Thursday of every month

Burke Museum	206.543.5590	(www.washington.edu/burkemuseum/)
Mount Saint Helens	360.449.7800	(www.fs.fed.us/gpnf/mshnvm/)

Camps & Classes

- Find out about the Pacific Science Center camp every summer in Seattle. Scholarships are available. (206.443.2925)
www.cmiregistration.com/user/org/category.jxp?id=2367&org=135
- Coyote Central offers year-round classes for 5th-9th grade students that include science and technology-related activities such as cooking, building soapbox derby cars, welding, glass blowing, robotics, and lots more. Scholarships are available. (206.323.7276) www.coyotecentral.org/
