Custodial

Background Data

- Currently there are 356.5 school-based custodians
- 104 building locations
- Current cleaning process
  - Classrooms and Offices – 3-day cleaning rotation
  - Daily garbage removal
  - Restrooms – one daily cleaning
  - Lunchrooms – one daily cleaning

Potential new service model

Students would be eating in the classrooms so need for cleaning would increase.
Disinfecting classrooms and high use areas would be required.

- Cleaning Standard may be:
  - Classrooms- daily cleaning
  - Daily garbage removal
  - Restrooms - multiple cleanings per day
  - Lunchrooms repurposed for classroom use or storage
  - Sanitizing high touch points - multiple times per day

Additional costs currently estimated as $11.6M more for the school year.

Other Considerations:

- Potential need to contract disinfecting or additional cleaning services
- Potential desire for buildings to circulate more outside air would also impact utility usage
