

Expanded Learning Partnership Tools

**SPS Expanded Learning Programs and Services Inventory List**

A planning group of principals, partners, SPS staff, and the City identified services and programs that are critical in supporting whole child needs/strengths and should be available at each K-8 school. Listed below are services and programs that could be offered through an Expanded Learning program, depending on the identified student needs at an individual school. Annually SPS Principals and/or site coordinators should take inventory of existing programs and partners within the school, and this is a tool that you can use to do so. If a partner fits into multiple categories, consult with them about which category their work best fits into. By using this tool, you can pinpoint any unmet needs to seek out more partners, or make plans to expand existing partnerships. Once completed, utilize the **Space Use Worksheet** to plan facility use and coordination within the building.

Programs and Services	Expanded Learning Program Offerings				Cost, Other Information
	Organization/Program (name of CBO, school, or agency)	Ages Served	Days and Times	Needs licensable space?
