Water Graphs & Data

by building

2011/12 Water Graphs & Data

Adams Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

ALKI Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

ARBOR HEIGHTS Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

B.F. DAY Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

BAGLEY Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

BALLARD High School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

BEACON HILL Elementary Schol

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

BLAINE K-8 School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

BROADVIEW-THOMSON K-8 School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

BRYANT Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

CLEVELAND High School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

COE Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

CONCORD Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

"Water" includes all water that has entered the sewer system. "Irrigation" is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

PATHFINDER K-8 School, at Cooper

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

DEARBORN PARK Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

DENNY/SEALTH CAMPUS

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

DUNLAP Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

ECKSTEIN Middle School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

EMERSON Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

FRANKLIN High School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

GARFIELD High School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

GATEWOOD Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

GATZERT Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

GRAHAM HILL Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

"Water" includes all water that has entered the sewer system. "Irrigation" is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

GREEN LAKE Elementary School

Utility Conservation Programs

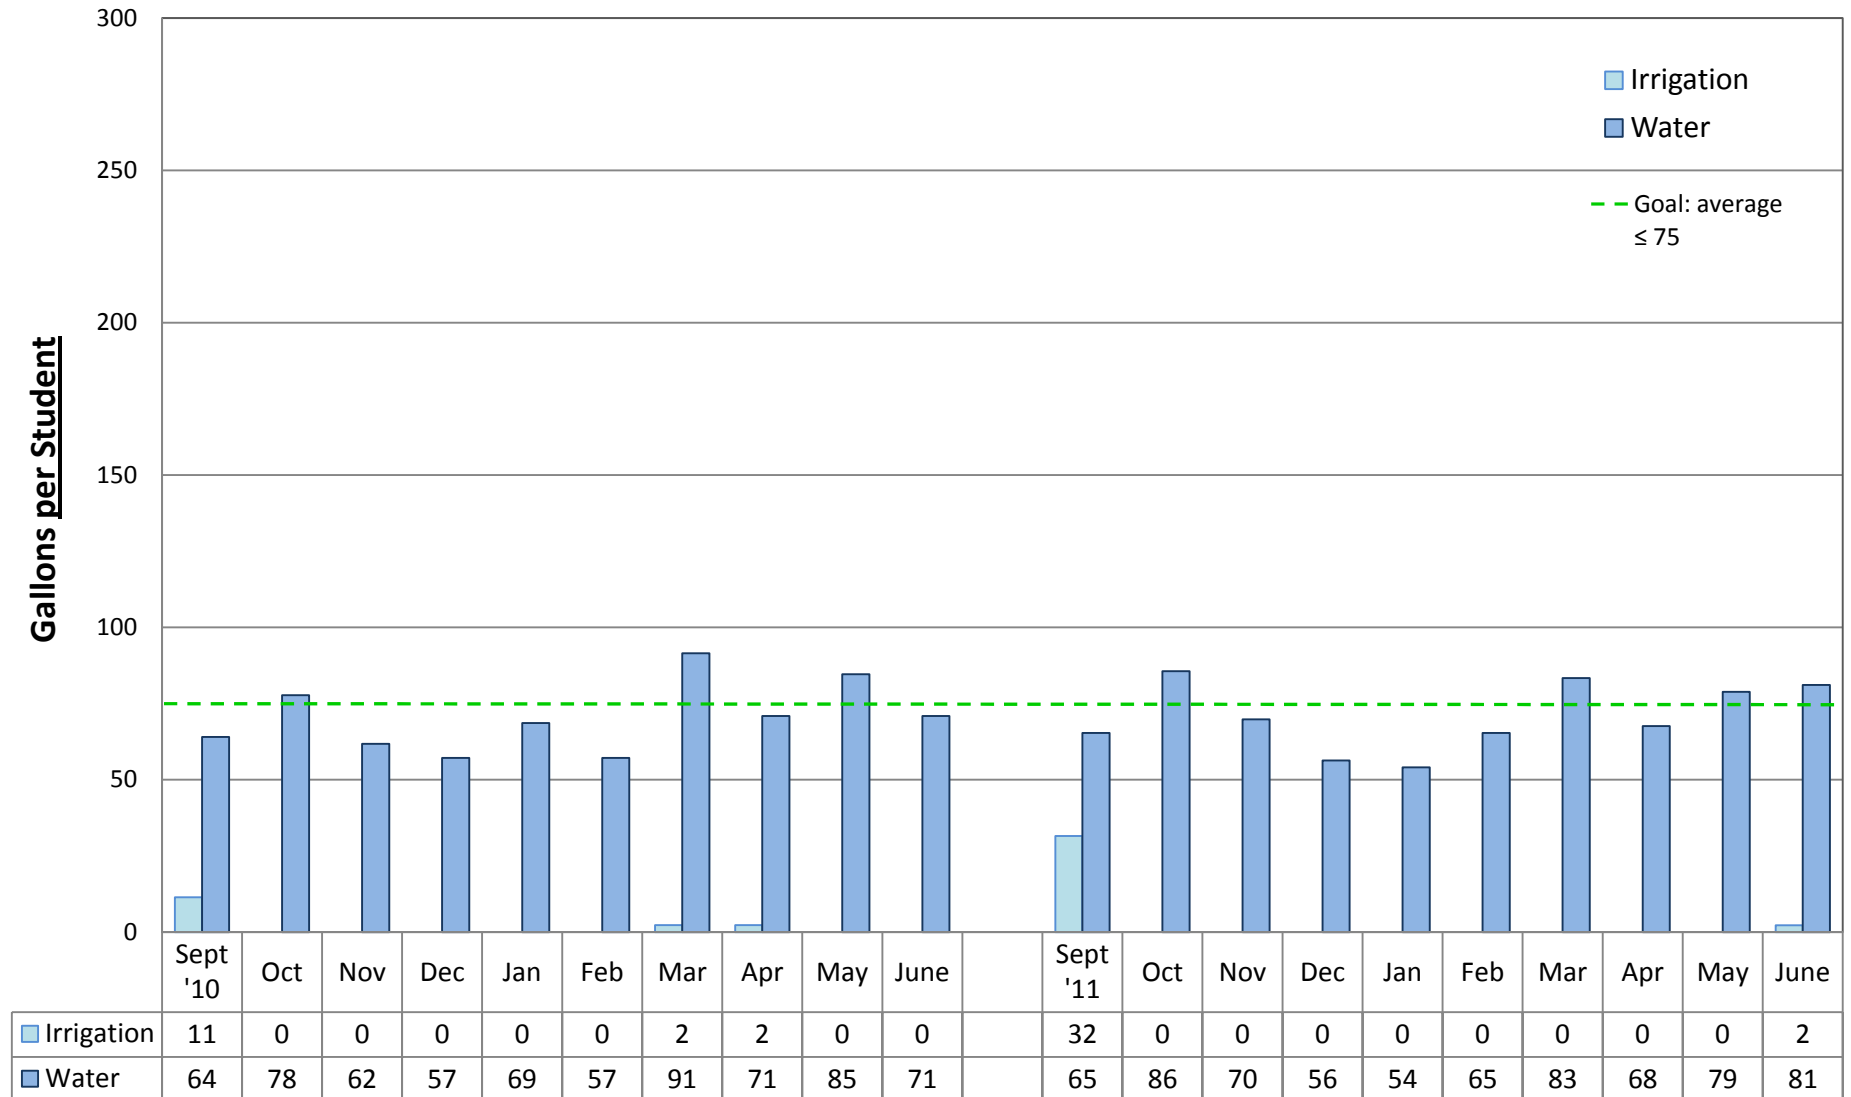

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

GREENWOOD Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

HALE High School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

HAMILTON Middle School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

HAWTHORNE Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

JOHN HAY Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

HIGHLAND PARK Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

INGRAHAM High School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

"Water" includes all water that has entered the sewer system. "Irrigation" is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

JANE ADDAMS K-8 School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

JOHN STANFORD INT'L Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

KIMBALL Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

M.L. KING, JR. Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

LAFAYETTE Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

LAURELHURST Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

LAWTON Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

LESCHI Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

LINCOLN BUILDING

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

LOWELL Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

LOYAL HEIGHTS Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

MADISON Middle School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

MADRONA K-8 School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

"Water" includes all water that has entered the sewer system. "Irrigation" is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

MAPLE Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

MCCLURE Middle School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

MCGILVRA Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

MEANY BUILDING

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

MERCER Middle School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

"Water" includes all water that has entered the sewer system. "Irrigation" is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

MONTLAKE Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

MUIR Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

NORTH BEACH Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

NORTHGATE Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

OLYMPIC HILLS Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

OLYMPIC VIEW Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

ORCA K-8 School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

"Water" includes all water that has entered the sewer system. "Irrigation" is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

PINEHURST K-8 School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

"Water" includes all water that has entered the sewer system. "Irrigation" is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

QUEEN ANNE Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

RAINIER BEACH High School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

RAINIER VIEW Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

"Water" includes all water that has entered the sewer system. "Irrigation" is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

ROGERS Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

ROOSEVELT High School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

ROXHILL Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

SACAJAWEA Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

SALMON BAY K-8 School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

SAND POINT Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

SANISLO Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

SCHMITZ PARK Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

TOPS K-8 School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

AKI KUROSE Middle School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

"Water" includes all water that has entered the sewer system. "Irrigation" is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

SOUTH LAKE High School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

SOUTH SHORE K-8 School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

STEVENS Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

"Water" includes all water that has entered the sewer system. "Irrigation" is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

THORNTON CREEK Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

"Water" includes all water that has entered the sewer system. "Irrigation" is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

THURGOOD MARSHALL Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

"Water" includes all water that has entered the sewer system. "Irrigation" is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

VAN ASSELT Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

VIEW RIDGE Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

VIEWLANDS Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

WEST SEATTLE Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

WASHINGTON Middle School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

WEDGWOOD Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

WEST SEATTLE High School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

WEST WOODLAND Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

"Water" includes all water that has entered the sewer system. "Irrigation" is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

WHITMAN Middle School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

WHITTIER Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

"Water" includes all water that has entered the sewer system. "Irrigation" is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.

2011/12 Water Graphs & Data

WING LUKE Elementary School

Utility Conservation Programs

Data is based on information from monthly utility bills and Oct enrollment numbers. Conversion factor: 1 CCF = 748 gallons.

“Water” includes all water that has entered the sewer system. “Irrigation” is metered water from a dedicated or deduct meter registered with Seattle Public Utilities.
