

**Seattle Public Schools' Seismic Improvements for Earthquake Safety
Completed/To Be Completed – update October 2020**

The safety of our students and staff is our top priority. Seismic improvement projects have been completed at Seattle Public Schools' buildings to meet applicable city codes at the time of construction.

Seattle Public Schools will continue to implement seismic improvements to school buildings on a predictable schedule that prioritizes the need for seismic improvements based on the most recent engineering studies. Seattle Public Schools Building Excellence (BEX) and Buildings, Technology and Academics (BTA) capital levies, approved by Seattle voters, provide funding for seismic improvements for our school buildings.
