**How to Turn on Battery Saver Mode for Windows Laptop**

Battery saver mode is designed to extend your laptop’s battery life until you can charge your laptop.

What does Battery Saver Mode do?

- Reduces the display’s brightness
- Reduces Background apps from being run

While unplugged from a power adapter, click on the **Action Center** button on the lower right corner

This would open the **Action Center**
Click on the **Battery Saver** tile, this will turn on Battery Saver Mode

Battery saver mode will automatically turn off once you have plugged your laptop into a charger
