

NEIGHBORHOOD UPDATE

MERCER MIDDLE SCHOOL

Greetings neighbors and happy October!

As you may have noticed, the building demolition is complete, and the Mercer Middle School project is now focused towards finishing the building pad and geothermal well drilling so that the foundations can start off smoothly. As part of that process, we will begin foundation improvements mid-month, and shortly after we will start underground plumbing and electrical installations. Site storm drainage continues to move along to get as much installed before the weather proves to be too challenging to continue.

As was the case with September, large volumes of trucks are entering and exiting the site. All truck drivers and equipment operators are trained to make eye contact with pedestrians, bikers, and vehicles as they enter the roads, so please don't be shy. Give them a wave and say "hi" so they know you're there!

Next month, the concrete foundations and waterproofing will kick off. Stay tuned for next month's update!

GOOD TO KNOW

WORKING HOURS

- ✓ **Standard work hours are 7AM-5PM, Monday-Friday.** However, we may need to work additional hours on the project, including at night and on weekends. In all cases, working hours will be in full compliance with City of Seattle ordinances.

NOISE & VIBRATION

- ✓ **All activities will comply with City of Seattle noise ordinance.** Please note that backup alarms are required by Washington Industrial Safety and Health Act (WISHA) and cannot be turned off.

DELIVERIES

- ✓ **The main project delivery is off of South Columbian Way.** Deliveries off 16th Ave. S. will be limited, on a case-by-case basis.

TEMPORARY EROSION AND SEDIMENT CONTROL (TESC)

- ✓ The project includes controlling all stormwater per the required TESC plan to ensure only clean water leaves the site.

ONSITE CONDUCT

- ✓ All employees are required to adhere to Cornerstone's and Seattle Public Schools' jobsite conduct policies, which are strictly enforced.
