

## Seattle Public Schools on City of Seattle's Unreinforced Masonry (URM) List

Updated July 2024

Earthquake safety improvements are made to our school buildings on a predictable schedule that prioritizes the need for seismic improvements based on the most recent engineering studies. This list includes only those buildings on the City's URM list. For a complete list of seismic improvements, please visit:

[www.seattleschools.org/seismic](http://www.seattleschools.org/seismic).

| Seattle Public School building shown on the City of Seattle's Unreinforced Masonry (URM) List* | Year of most recent seismic retrofits | Note                                   |
|--|---------------------------------------|--|
| Bagley, Daniel   | 2020                                  | Major renovation                       |
| Concord  | 2000                                  |  |
| Day, B.F.  | 2017                                  |  |
| Dunlap   | 2000                                  | Major renovation                       |
| Hughes, E.C. (Roxhill ES)  | 2018                                  | Major renovation                       |
| Emerson  | 2001                                  | Major renovation                       |
| Franklin   | 2015                                  |  |
| Gatewood   | 2017                                  |  |
| Greenwood  | 2002                                  |  |
| Laurelhurst  | 2019                                  |  |
| Lincoln  | 2022                                  | Major renovation (west buildings 2019) |
| Lowell   | 2018                                  |  |
| McDonald   | 2012                                  |  |
| McGilvra   | 2015                                  |  |
| Magnolia   | 2019                                  | Major renovation                       |
| Mann, Horace (Nova)  | 2015                                  | Major renovation                       |
| Marshall, John (interim site)  | 2014                                  |  |
| Monroe (Salmon Bay K-8)  | 2017                                  |  |
| North Queen Anne   | 2023                                  | Major renovation                       |
| Queen Anne ES (aka Old Hay)  | 2019                                  |  |
| Seward (TOPS)  | 1999                                  |  |
| View Ridge   | 2019                                  |  |
| Webster (Licton Springs K-8)   | 2020                                  | Major renovation                       |
| West Seattle HS  | 2002                                  |  |

\*The Nisqually Earthquake, with a magnitude of 6.8 on the seismic scale, did not cause structural damage to any of Seattle Public School's buildings, as determined by City of Seattle building inspectors.
