Seattle Public Schools is committed to making its online information accessible and usable to all people, regardless of ability or technology. Meeting web accessibility guidelines and standards is an ongoing process that we are consistently working to improve.

While Seattle Public Schools endeavors to only post documents optimized for accessibility, due to the nature and complexity of some documents, an accessible version of the document may not be available. In these limited circumstances, the District will provide equally effective alternate access.

Schools' Funding Allocations

2026-27

Published February 24, 2026

Revised March 4, 2026

About the Purple Book

The Schools' Funding Allocations ("Purple Book") is published annually by the Budget Office to provide details on the Weighted Staffing Standards (WSS) school allocation model and specific school staffing and budget allocations for the upcoming year.

WEIGHTED STAFFING STANDARDS (WSS) ALLOCATION MODEL

The Weighted Staffing Standards (WSS) model provides each school with staffing designed to meet staff to student ratio requirements for Basic Education, Special Education, and Multilingual Instruction programs. In addition, the WSS model includes per-pupil funding for each school to customize their budget to meet their unique needs. These per-pupil dollars can be used for additional staffing, supplies, curriculum, and professional development.

SCHOOLS' ALLOCATIONS FOR THE 2026-27 SCHOOL YEAR

Schools are allocated staff and non-staff budget in February each year, upon which to build their budget for the following year. These allocations are based on enrollment projections provided by Enrollment Planning, applied to the Weighted Staffing Standards (WSS) model.

Schools develop their budget for the upcoming year based on these enrollment projections, staffing and budget allocations. Additional minor changes to schools' allocations may be made up to the final "locked" version that becomes the district's budget for the 2026-27 fiscal year that is recommended to the School Board for approval.

WSS Model Changes for 2026-27

ADJUSTMENTS TO THE WSS MODEL

- Grades K-3 align with maximum state funding of 17:1.
- Grades 4-5 increase allocation model to 28:1.
- Grades 6-12 increase allocation model to 32:1.
- CTE teacher allocation aligns to secondary allocation model.
- Adjust rounding for ML teacher and secondary counselor FTE.

The class size tables in this book are funding models used to allocate resources to schools in alignment with district class-size and student-teacher ratio requirements. They are not intended to reflect the exact class sizes that will occur in every classroom. Schools have flexibility to build master schedules that work for their students and programs, if they meet all contractual class-size requirements.

MULTILINGUAL TEXTUAL MATERIALS

The materials allocation for Multilingual Education of \$10 per eligible student for supplemental instructional materials has been removed from the WSS model and will no longer be provided or preloaded into school budgets. Multilingual staff will work with school leaders to ensure appropriate access continues.

HIGH SCHOOL AIS ALLOCATION INCLUDED IN LAP

The 1.0 FTE Academic Intervention Specialist allocation at high schools is now split funded between WSS and LAP. High Schools will see 0.5 FTE in their WSS allocation and an increased 0.5 FTE in their LAP allocation to maintain a full 1.0 AIS position.

ACTIVITY COORDINATORS AT COMPREHENSIVE HIGH SCHOOLS

Activity Coordinators are allocated through the WSS model as 1.0 FTE and must be staffed as a 1.0 FTE position.

NON-TRADITIONAL SCHOOLS

Due to the unique nature of the various programs in Non-Traditional Schools, the funding allocation varies according to needs of specific schools and programs.

The state mandates certain program codes be used for specific programs. Non-traditional schools may see their allocations in state program codes other than the typical "01" (e.g., "02" Alternative Learning (ALE), "03" Open Doors, and "45" Skills Center programs).

Additional discretionary funding may be included in the unique formula for specific schools, to meet the needs of each school.

ADJUSTMENTS TO SECONDARY SCHOOL AAFTE

In the Weighted Staffing Standards model, part of the weighting process is determined by the number of students in specialized programs and the approximate amount of time those students spend with teachers other than Basic Education teachers.

The district adjusts (weights) the projected Annual Average Full Time Enrollment (AAFTE) for secondary schools (middle and high schools) by the estimated amount of time that students in specialized programs spend in contact with teachers for those specialized programs. AAFTE for Elementary and K-8 schools is not adjusted for contact time.

The factors used to estimate contact time with teachers in specialized programs are:

- 40% Transitional Bilingual (TBIP/ML) program
- 20% Special Ed Resource program
- 60% Special Ed Extended Resource
- 60% Special Ed Focus program
- 80% Special Ed Distinct program
- 80% Special Ed Medically Fragile program
- 60% Special Ed Deaf/Hard of Hearing program
- 60% Special Ed Transition program

As an example: a high school special education student in a Resource program is estimated to spend 20% of their time with a Special Education teacher, and 80% of their time in Basic Education instruction. Accordingly, AAFTE for that student is adjusted to 0.8 for the purpose of allocating Basic Education teachers.
