

Math Summer Learning Packet

Seattle Public Schools is committed to making its online information accessible and usable to all people, regardless of ability or technology. Meeting web accessibility guidelines and standards is an ongoing process that we are consistently working to improve.

While Seattle Public Schools endeavors to only post documents optimized for accessibility, due to the nature and complexity of some documents, an accessible version of the document may not be available. In these limited circumstances, the District will provide equally effective alternate access.

The Math Summer Prep is for incoming Decatur students or current students who want to bridge or maintain their math skills. At Decatur, students are working two levels above grade level. For example, a student who has completed first grade and starts as a second-grade student at Decatur will study fourth grade math. It provides a variety of printable materials, web based materials, and math skill building games.

Summer Math Guide Grade 4

What incoming 4th grade math students should know:

- Multiplication & Division Facts 1-12
- Multiplying and dividing by 10, 100, 1000 etc.
- 1 x 2 and 2 x 2-digit multiplication, including decimals
- Dividing multidigit numbers, including decimals
- +/- with numbers to 1000s place and decimals
- equivalent fractions and ordering fractions as well as converting improper to mixed numbers
- Add/Subtract Fractions (like/unlike denominators)
- Multiply/Divide Fractions
- Understand area and volume

Suggested Schedule: Do what works best for your family. While the printable packet and interactive websites do provide some feedback, having an adult there to further explain will help a lot!

Potential 30 min. Schedule:

- 5 min. -- warm up with a game*
- 5 min. -- watch a video to refine a skill
- 15 min. -- interactive website or packet work
- 5 min. -- use new skills to replay game

Potential 15 min. Schedule:

- 5 min – warm up with a game* or watch a video to refine a skill
 - 10 min – interactive website or packet work
- OR**
- Play a game for 15 minutes*

**If your student does not yet recall multiplication and division facts with fluency (10 – 15 second recall), please have them review their facts daily. The online flashcards at Mathigon have an excellent approach. See link under Interactive Websites for details.*

Resources:

Videos: These short videos (~ 5min.) to help students “warm up” to math work.

Games: These are games that you can print out, obtain at a store, or access online. The Envision math curriculum has online games which are included here.

Interactive Websites: Links to iXL & Kahn Academy as well as Mathigon. Kahn Academy has a wonderful “Get Ready Series” for summer. Links are related to topics for that week. Use what appeals to your student – different websites have different approaches.

Printable Packet: Focused practice on the weekly topic to print and complete at home. The Envision math curriculum provides at home activities for families which are included here. Parent help is essential to help students complete the worksheets. **Complete as much as needed to feel confident in the topic.**

Math Tool Kit: A set of quick reference sheets students could use in the summer and during the school year.

Week 1: Multiplication & Division fact review + Multiplying and Dividing by 10, 100, & 1000
