SAT/PSAT Bluebook Setup

Fully update your SPS laptop before attempting to install Bluebook. Personal devices cannot be used for SAT/PSAT testing.

1. Sign in with your SPS account.
2. Open Software Center from the Start menu.
3. Select Updates > Install All.

   - If no updates are listed, go to Installation Status and sort by Status.

   - Look for updates showing Downloading, Installing, Pending Restart, or Past Due.
   - Select any incomplete update and follow the prompts to complete or retry it.
   - If an update continues to fail, restart the laptop and check Software Center again. Multiple restarts may be required.
4. Keep the laptop plugged in and awake during the entire update process. If the laptop goes to sleep, updates will stop downloading and installing.
   - If necessary, play a YouTube video to help keep the laptop awake while it is unattended.

5. Restart whenever prompted.
6. Return to Software Center after each restart and continue checking until no updates remain.
7. Sign out of your SPS account.
8. Sign in with the Bluebook testing account provided by your school.
9. On the desktop, click the Install Bluebook which will open Software Center, press install Bluebook.

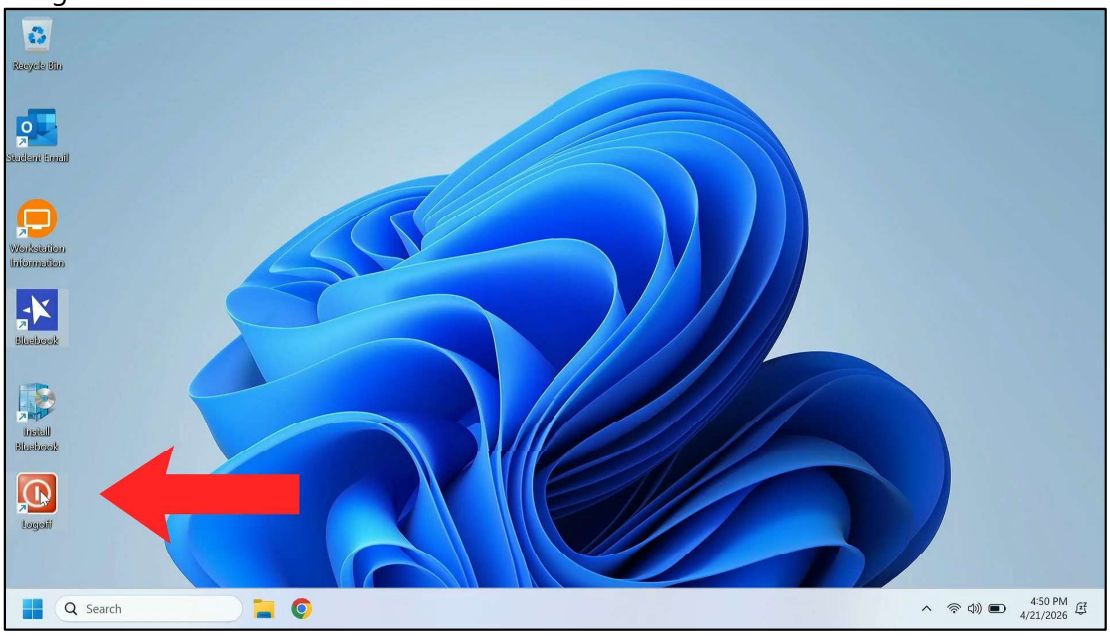

10. Once Bluebook icon appears on the desktop, double-click to confirm it can launch.

11. To exit the test environment, press the Logoff icon on the desktop. Start menu is disabled by design.

IMPORTANT: Do not install Bluebook until all Windows updates and required restarts are complete.
